SOFTWARE DEVELOPER

SKILLS

Languages: Java, Python, JavaScript, TypeScript, SQL, HTML/CSS

Frameworks & Libraries: Django, .NET, Express, Node.js, React, Next.js, PostgreSQL, MongoDB, Three.js, Redux Toolkit, Redis

DevOps & Tools: Docker, GitHub Actions, RESTful APIs, Postman, GitHub, ClickUp

EDUCATION

Tufts University, Medford, MA

Masters in Computer Computer Science (est. 2026)

Post-baccalaureate Certificate in Computer Science (2024)

Webster University, St. Louis, MO

Bachelors in Business Administration (2005)

WORK EXPERIENCE

[CallSine](#)

Philadelphia, PA (onsite)

Fullstack Developer (ending role)

Frontend Developer (starting role)

May 2024 - Sept 2025

December 2024 - Sept 2025

May 2024 - December 2024

- **Led comprehensive platform migration** from Create React App to Next.js to address performance limitations, implementing modern architecture that significantly improved application performance and user experience.
- **Refined and engineered multi-channel AI prompt pipelines** leveraging Claude and OpenAI APIs, optimizing prompt structures and model selection to improve consistency, accuracy, and quality of generated outputs across diverse use cases.
- **Optimized backend service performance** for Django APIs serving large datasets, refactoring serializers and database queries to resolve performance bottlenecks affecting tens of thousands of concurrent users.
- **Developed real-time analytics platform** to meet user demand for data insights, building customizable Three.js charts and visualizations integrated with Django backend to deliver actionable performance metrics.
- **Managed production infrastructure and incident response** including Docker containerization, system monitoring, daily maintenance operations, and rapid hot-fix deployments ensuring 99%+ uptime for live services.
- **Led incident response and customer escalation processes**, implementing automated deployment pipelines and maintaining service reliability through proactive monitoring and rapid issue resolution.
- **Introduced Redux Toolkit for global state management** to address application state complexity issues, implementing standardized store architecture and slice patterns that created a robust and manageable state system across the entire frontend application.

PROJECTS

[AI-Enhanced Dream Journal](#) – 2024 (React, Node.js, Python, Django, FastAPI, Docker, Digital Ocean)

- **Built scalable backend infrastructure** with Django and FastAPI microservices, implementing containerized deployment on Digital Ocean with Docker for reliable, distributed service architecture.
- **Designed and implemented an AI pipeline** with OpenAI API and LangChain to generate real-time thematic and emotional analysis by cross-referencing a custom knowledge library.
- **Integrated FastAPI microservices** to handle third-party API calls asynchronously, improving system efficiency and keeping the main backend lightweight.

[Balancer](#) - An AI Tool For Medical Prescribers - 2023 ([Code For Philly](#) || React, Node.js and Python)

- **Integrated OpenAI API with custom web-scraping utilities to power a chatbot** that cross-referenced medical information, enabling prescribers to access accurate, real-time contextual data during decision making
- **Built responsive React components using TypeScript** following established design system standards, improving code maintainability and development velocity for the team.
- **Collaborated cross-functionally with UX/UI and backend teams** to implement seamless user workflows while ensuring robust data validation and efficient API integration.

[Photography App](#) - 2022 (Javascript, React, Express.js, Node, MongoDB)

- **Developed a full-stack photo management application** with searchable keyword tagging and dynamic filtering capabilities, managing 500+ images using MongoDB, Express.js, React, and [Node.js](#).
- **Designed and implemented a card-based interface architecture** with responsive grid layouts and interactive search functionality, enabling users to efficiently browse keyword-grouped photo collections.

[Create-TypeScript-App](#) - 2023 - A Bootstrapper for TypeScript Developers || (TypeScript)

- **Contributed to system improvements by refactoring TypeScript codebase** and integrating third-party APIs.
- **Increased total test coverage by writing tests with Jest and Vitest**, focusing on edge cases and proper data handling, and enhancing technical documentation.

OTHER WORK EXPERIENCE

[Big Muddy Records](#)

August 2005 - May 2020

St. Louis, MO (onsite)

Founder, General Manager

- **Built an independent music brand and assembled teams** of musicians and administrative professionals, establishing a strong regional presence across the Midwest.
- **Managed and maintained data accuracy** for a digital distribution catalog of 500+ digital assets, handling precise metadata and financial reporting through Excel and QuickBooks, ensuring consistency across distributed digital channels.
- **Directed full lifecycle project management** for 50+ projects, coordinating remotely with artists, technical teams, and external partners to ensure on-time, within-budget deliveries through clear virtual communication and task management.
