Software Engineer

Executive Summary

Music industry professional transitioning to development work to **use tech to solve turning messy, human heavy workflows into reliable automations and tools** that people actually use. **Over three years of experience building React and Python services, AI assisted workflows, and data pipelines** that sit between users, APIs, and external systems.

Education

Tufts University, M.S. Computer Science (in progress, 2026); Post-bacc Certificate in CS (2024)

Webster University, B.S., Business Administration (2005)

TECHNICAL SKILLS

- **Languages:** Python, JavaScript, TypeScript, SQL, Java
 - **Backend:** Django REST Framework, FastAPI, Node.js / Express, REST APIs
 - **Frontend:** React, Next.js, HTML/CSS
 - **AI / LLM:** OpenAI API, LangChain, retrieval augmented generation (RAG)
 - **Data & Storage:** PostgreSQL, MongoDB, Redis
 - **DevOps / Infra:** Docker, Git, GitHub Actions, Nginx
-

Experience

[CallSine](#) — Full-stack Developer | Philadelphia, PA | May 2024–Sept 2025

Agentic sales outreach platform using React / TypeScript frontends, Python / Django and FastAPI services, and Dockerized deployment.

- Refactored Django serializers and eliminated N+1 queries in high traffic endpoints, **cutting API response times by about 60 percent**.
- Helped migrate the frontend from Create React App to Next.js, **improving load times by over 50%** through server side rendering and static generation.
- Built and maintained multi step AI prompt pipelines that coordinated multiple model calls and tools, **improving consistency and quality of generated outreach content** across different channels.
- **Standardized state management** with Redux Toolkit and stronger TypeScript types, **reducing regressions** when new features shipped and making it easier to reason about cross page flows.
- **Worked directly with customers and internal users to troubleshoot production issues**, translate vague requests into scoped tickets, and iterate on features until they matched real workflows.

Freelance Consultant — E-commerce Solutions Engineer | Jan 2021–Sept 2025

Worked with multi channel retailers to stabilize catalog, inventory, and operations data across systems.

- Built a buffered sync service between Akeneo and Shopify that handled **more than 10,000 products per day**, reducing sync time from hours to minutes and giving staff reliable updates.
- Introduced queue based inventory updates using Amazon SQS, processing deltas in near real time and **cutting oversell incidents while providing clear logs and metrics** for support teams.
- Designed a fault tolerant synchronization pipeline with tiered retries and buffered database writes that **reduced database I/O by roughly 80 percent** during peak processing windows.

PROJECTS

[Approps](#) – Congressional Appropriations Explorer

Next.js, FastAPI, Python, PostgreSQL, PDF tooling, OpenAPI

- Built an end to end pipeline that converts unstructured U.S. appropriations PDFs into normalized PostgreSQL tables with program names, amounts, and page locations, making dense budget documents searchable and comparable in a simple web UI.
- Implemented a FastAPI backend that computes diffs across bill versions and exposes APIs used by a Next.js frontend so users can see how line items and totals change across time in a few clicks.

[Balancer](#) – AI Tool for Medical Prescribers (Code for Philly)

React, TypeScript, Node.js, Python

- Helped design and implement React flows for a RAG based decision support tool that lets clinicians query case studies and compare treatment options through clear, structured screens instead of raw prompts.
- Collaborated with clinicians and engineers to refine prompts and output formatting so results were understandable, safe, and aligned with how prescribers actually think about tradeoffs.

Other Work Experience

[Big Muddy Records](#) — Founder & GM | St. Louis, MO | Aug 2005–May 2020

- Operated catalog workflows for 50+ releases and 500+ digital assets; led remote teams and vendors.
- Directed cross-functional teams to deliver releases on schedule and within budget.
- Worked with artists to grow brands and establish regional audiences, enabling them to play 100+ shows a year across the country.
