SOFTWARE DEVELOPER

SKILLS

Languages: Python, JavaScript, TypeScript, Java, SQL, HTML/CSS

Frameworks & Libraries: React, Next.js, Django, Node.js, Express, .NET, Three.js, PostgreSQL, MongoDB

AI/ML Technologies: OpenAI API, LangChain, prompt engineering, AI pipeline development

DevOps & Tools: Docker, GitHub, Postman, ClickUp, RESTful APIs, Agile development

Design & UX: Responsive design, accessibility implementation, user-centered development

EDUCATION

Tufts University, Medford, MA

Masters in Computer Science (est. 2026)

Post-baccalaureate Certificate in Computer Science (2024)

Webster University, St. Louis, MO

Bachelors in Business Administration (2005)

WORK EXPERIENCE

[CallSine](#)

Philadelphia, PA

May 2024 - Sept 2025

Fullstack Developer (ending role)

Frontend Developer (starting role)

- **Spearheaded a full platform migration from Create React App to Next.js**, boosting application performance by 50% and improving Lighthouse scores by 30 points through server-side rendering and static site generation.
- **Refined and engineered multi-channel AI prompt pipelines** leveraging Claude and OpenAI APIs, optimizing prompt structures and model selection to improve consistency, accuracy, and quality of generated outputs across diverse use cases.
- **Slashed API response times by 60%** for a Django backend supporting 20,000+ concurrent users by refactoring database queries and optimizing data serializers, eliminating critical performance bottlenecks.
- **Developed real-time analytics platform** to meet user demand for data insights, building customizable Three.js charts and visualizations integrated with Django backend to deliver actionable performance metrics.
- **Managed production infrastructure and incident response** including Docker containerization, system monitoring, daily maintenance operations, and rapid hot-fix deployments ensuring 99%+ uptime for live services.
- **Led incident response and customer escalation processes**, implementing automated deployment pipelines and maintaining service reliability through proactive monitoring and rapid issue resolution.
- **Introduced Redux Toolkit for global state management** to address application state complexity issues, implementing standardized store architecture and slice patterns that created a robust and manageable state system across the entire frontend application.

PROJECTS

[AI-Enhanced Dream Journal](#) – 2024 (React, Node.js, Python, Django, FastAPI, Docker, Digital Ocean)

- **Designed and implemented comprehensive AI pipeline** using OpenAI API and LangChain for real-time thematic and emotional analysis, developing custom prompt engineering strategies and fine-tuning approaches for psychological content analysis
- **Built scalable RESTful backend architecture** in Django with PostgreSQL database design, implementing secure user authentication, data validation, and API rate limiting for production deployment
- **Architected microservices integration with FastAPI** for asynchronous third-party API processing, implementing robust error handling and maintaining system efficiency through lightweight service design

[Balancer](#) - *An AI Tool For Medical Prescribers* - 2023 ([Code For Philly](#) || *React, Node.Js and Python*)

- **Built responsive React components using TypeScript** following established design system standards, improving code maintainability and development velocity for the team.
- **Collaborated cross-functionally with UX/UI designers and backend teams** to implement seamless user workflows, conducting user research sessions and implementing feedback to optimize interface design for complex data visualization needs

[Create-TypeScript-App](#) - 2023 - A Bootstrapper for TypeScript Developers || (*TypeScript*)

- **Contributed to system improvements by refactoring TypeScript codebase** and integrating third-party APIs.
- **Increased total test coverage by writing tests with Jest and Vitest**, focusing on edge cases and proper data handling, and enhancing technical documentation.

OTHER WORK EXPERIENCE

[Big Muddy Records](#)

August 2005 - May 2020

St. Louis, MO

Founder, General Manager

- **Built an independent music brand and assembled teams** of musicians and administrative professionals, establishing a strong regional presence across the Midwest.
- **Managed and maintained data accuracy** for a digital distribution catalog of 500+ digital assets, handling precise metadata and financial reporting through Excel and QuickBooks, ensuring consistency across distributed digital channels.
- **Directed full lifecycle project management** for 50+ projects, coordinating remotely with artists, technical teams, and external partners to ensure on-time, within-budget deliveries through clear virtual communication and task management.
